DEPARTMENT OF FOOD TECHNOLOGY

PROGRAMMES OFFERED

B.SC FOOD TECHNOLOGY

Food technology is the application of food science to the selection, preservation, processing, packaging, distribution and use of safe nutrition and wholesome foods. It involves utilizing knowledge and techniques to improve the quality, safety, and sustainability of our food system.

Specialized Areas Within Food Technology

- Food Engineering

Applying engineering principles to design and optimize food processing equipment and systems.

- Food Microbiology

Studying the role of microorganisms in food production, spoilage, and safety.

- Food & Nutrition

Analyzing the nutritional content of food and its impact on human health.

- New Product Development

Creating innovative food products that meet consumer demand and market trends.

Career Opportunities in Food Technology

1. Research and Development

Developing new food products, technologies, and improving existing processes.

2. Food Production

Supervising and managing food production processes, ensuring quality and efficiency.

3. Quality Assurance and Control

Monitoring and testing food products to ensure compliance with safety and quality standards.

🏢 Employment Sectors

Government Sector:

- Opportunities with FSSAI, roles such as:
Food Safety Officer (FSO)
- Technical Assistant
- (TA) Regional Officer (RO)

Private Sector:

- Roles in:
 - Quality control
 - Production
 - R&D
- Food safety departments in food companies

Facilities and Training

Lab Facilities: Well-equipped, modern laboratories offer hands-on experience in food analysis, processing, and quality control.

Industrial Exposure: Students benefit from industrial visits and in-plant training to bridge the gap between academic theory and real-world practice.

✅ Eligibility

Completion of +2 Science with a strong academic foundation is required.
